

Accomplished AWS Cloud & DevOps Project Manager with **over 16 years** of progressive experience in cloud engineering, DevOps strategy, and enterprise IT operations. Targeting senior-level opportunities in the AWS Cloud Architecture, Cloud Infrastructure Management and Delivery Manager.

PROFILE SUMMARY

Currently leading high-impact cloud initiatives at EPAM systems driving digital transformation through cloud migration, automation, and scalable infrastructure design. Proven success in reducing operational overhead & deployment cycles through strategic implementation of CI/CD pipelines and infrastructure as code. Experienced in AWS Cloud Architect and Data Engineer, skilled in designing scalable, secure cloud infrastructures and building robust data pipelines using AWS services to enable efficient data processing and analytics. Expert in aligning technical execution with business objectives, ensuring delivery of secure, cost-effective, and resilient cloud solutions. Skilled at managing cross-functional teams, optimizing resource utilization, and instituting Agile methodologies to enhance project efficiency and stakeholder satisfaction. Recognized for driving innovation in monitoring and automation systems, proactively improving service availability and performance.

CORE COMPETENCIES

Cloud Infrastructure Management

DevOps Best Practices

Agile Project Management

System Performance Optimization

Incident and Problem Management

ITIL Framework Implementation

Disaster Recovery Planning

Security Compliance in Cloud

Cost Optimization Strategies

Cross-Functional Team Collaboration

EDUCATION

2004-2008: Bachelors of Engineering - Computers from Mumbai University

CERTIFICATIONS

- AWS Certified Solution Architecture-Associate Level
- AWS Certified DevOps Engineer – Professional
- Google - Associate Cloud Engineer
- Redhat Certified Engineer (RHCE)
- AWS Partner-Generative AI Essential
- ITIL v3 Foundation

TECHNICAL SKILLS

Cloud Platforms & Services: AWS, GCP

AWS Core Services: EC2, VPC, S3, ELB, Redshift, DynamoDB, Athena, Glue, EMR, CloudWatch, CloudFormation, ECS, EKS

Identity and Access Management: IAM

Monitoring & Logging: Prometheus, Grafana, CloudWatch, ELK Stack

Containerization & Orchestration: Docker, Kubernetes, ECS, EKS

DevOps & CI/CD Tools: Git, GitHub, Bitbucket, Bamboo, Jenkins, Ansible, Terraform, XLDploy, CloudFormation, Docker

Collaboration & Project Management: Jira, Confluence, ServiceNow

Artificial Intelligence: Gen AI

CAREER TIMELINE

Server Engineer –
On-the-Job
Trainee | HCL
Infosystems Ltd. |
Mar 2009 - Jun
2010

System
Administrator –
Consultant |
Capgemini | Jun
2010 – Nov 2012

System
Administrator –
Linux Specialist |
Wipro
Technologies | Jan
2013 – Jul 2014

System Analyst –
DevOps Engineer |
ATOS India Pvt Ltd
| Aug 2014 – Jan
2017

Team Lead –
Application/Cloud
Support Specialist
| Accenture | Jan
2017 – Feb 2021

Cloud Architect -
Associate
Consultant | Wipro
Technologies |
Mar 2021 - May
2021

Manager -
Associate
Consultant | Tata
Consultancy
Services | Apr
2021 – Feb 2026

Delivery Manager
| EPAM Systems
| Feb 2026 -Till
Date

WORK EXPERIENCE

Delivery Manager | EPAM Systems | Feb 2026 – Till date

- Oversaw and coordinated end-to-end delivery of enterprise platforms, ensuring seamless alignment with business and technical requirements.
- Collaborated cross-functionally with teams to evaluate and select scalable, secure, and cost-effective platform solutions.
- Ensured proper setup and configuration of foundational elements within AWS organizations to optimize cloud environment for performance and compliance.
- Supported the establishment and enforcement of technical governance frameworks, defining standards and best practices to drive consistency, reliability and security.
- Aligned technology decisions with organizational goal and long-term growth strategy.

AWS DevOps Manager – Associate Consultant | Tata Consultancy Services | Apr 2021 – Feb 2026

- Directed cross-functional cloud engineering teams to ensure seamless project execution and adherence to AWS best practices.
- Spearheaded large-scale cloud migration initiatives, optimizing infrastructure performance & reducing operational expenditures.
- Engineered end-to-end DevOps solutions, automated deployment pipelines and achieving a 30% decrease in release cycle times.
- Aligned technology roadmaps with business objectives, driving innovation and supporting scalable enterprise growth.
- Championed Agile methodologies across teams, enhanced delivery efficiency by 20% and improved team collaboration.
- Delivered complex, multi-phase projects within scope, time, & budget constraints, consistently exceeding stakeholder expectations.
- Architected secure, scalable AWS cloud environments tailored to diverse client requirements.
- Advised clients on cloud adoption strategies, CI/CD modernization, and DevOps transformations to enhance operational resilience.

Cloud Architect - Associate Consultant | Wipro Technologies | Mar 2021 – Apr 2021

- Architected secure, scalable AWS solutions across compute, network, storage, and databases.
- Built automated, repeatable environments with Terraform/CloudFormation on AWS.
- Implemented AWS security controls including IAM policies, encryption, SG/NACL hardening, and logging via CloudTrail & Config.
- Optimized AWS cost and performance through right-sizing, storage tiering, and workload reviews.

Team Lead – Application/Cloud Support Specialist | Accenture | Jan 2017 – Feb 2021

- Led daily operations of AWS infrastructure, ensuring high availability, performance, and compliance across environments.
- Designed and deployed infrastructure-as-code (IaC) solutions using CloudFormation and Terraform for scalable cloud provisioning.
- Automated system management tasks via AWS SSM agents on Linux and Windows platforms, reducing manual interventions.
- Built resilient multi-region network architectures to support high-availability applications across global deployments.
- Designed, developed, and maintained scalable data pipelines to efficiently ingest, process, and transform large volumes of structured and unstructured data for analytics and reporting purposes.
- Streamlined server provisioning and application deployments using Bamboo while improving delivery speed.
- Configured proactive monitoring with AWS CloudWatch, enabling real-time visibility and system optimization.
- Developed robust CI/CD pipelines, enhanced release governance and deployment consistency.
- Collaborated with development teams to establish Git workflow; managed documentation in JIRA and Confluence for audit readiness.

System Analyst – DevOps Engineer | ATOS India Pvt. Ltd. | Aug 2014 – Jan 2017

- Instituted DevOps best practices including source control, CI/CD, and automated testing to improve release quality and time-to-market.
- Administered VPC configurations, IAM policies, and resource tagging aligned with security and compliance standards.
- Managed S3 for both static web hosting and secure data archiving.
- Designed and executed backup strategies for EBS volumes and S3 to ensure data durability and disaster recovery readiness.

System Administrator – Linux Specialist | Wipro Technologies | Jan 2013 – Jul 2014

- Maintained and supported over 4,000 UNIX servers across mission-critical environments.
- Led root cause analysis and resolution of high-impact incidents using Remedy, improved system uptime and reliability.
- Implemented ITIL-based processes for incident, change, problem, and patch management.
- Performed kernel upgrades and firmware patching on Solaris servers, ensured platform stability.
- Conducted disk space audits and optimized file system performance to maintain SLA compliance.
- Coordinated with cross-functional teams to sustain infrastructure integrity and business continuity.

System Administrator – Consultant | Capgemini | Jun 2010 – Nov 2012

- Administered user/group access controls and file permissions to maintain system security.
- Resolved LVM, Samba, Apache, and DNS server issues to support operational stability.
- Acted as SME for Nagios and open-source monitoring tools, enhanced observability and alerting processes.
- Deployed SNMP-based monitoring for network hardware, enabling real-time diagnostics and performance tracking.

Server Engineer – On-the-Job Trainee | HCL Infosystems Ltd. | Mar 2009 - Jun 2010

- Installed and configured Linux distributions via both physical media and remote provisioning tools.
- Managed user accounts, quotas, and permissions to enforce organizational access policies.
- Set up and maintained core network services (SSH, FTP, DNS, DHCP) for internal and client environments.
- Configured NFS and SAMBA for resource sharing and improved team productivity.
