Thane, India

## Profile Summary

Currently leading high-impact cloud initiatives at EPAM Systems, driving digital transformation through cloud migration, automation, scalable infrastructure design, and strong technical governance.

Proven success reducing operational overhead and deployment cycles through CI/CD modernization, infrastructure as code, and cloud architecture aligned to business outcomes.

## Core Competencies

Cloud Infrastructure Management

DevOps Best Practices

Agile Project Management

Security Compliance in Cloud

Cost Optimization Strategies

Disaster Recovery Planning

Incident and Problem Management

Cross-Functional Team Collaboration

## Technical Skills

### Cloud Platforms

AWS, GCP

### AWS Services

EC2, VPC, S3, ELB, Redshift, DynamoDB, Athena, Glue, EMR, CloudWatch, CloudFormation, ECS, EKS

### DevOps & Automation

Git, GitHub, Bitbucket, Bamboo, Jenkins, Ansible, Terraform, XLDeploy, Docker

### Monitoring & Platforms

Prometheus, Grafana, ELK Stack, Jira, Confluence, ServiceNow, IAM

## Education

### Bachelor of Engineering, Computers

Mumbai University

2004 – 2008

## Certifications

AWS Certified Solutions Architect - Associate

AWS Certified DevOps Engineer - Professional

Google Associate Cloud Engineer

Red Hat Certified Engineer (RHCE)

AWS Partner Generative AI Essential

ITIL v3 Foundation

## Personal Details

Languages: English, Hindi, Marathi

Location: Thane, India

## Professional Experience

### Delivery Manager | EPAM Systems

Feb 2026 – Present

- Oversaw end-to-end delivery of enterprise platforms aligned with business and technical requirements.

- Evaluated and selected scalable, secure, and cost-effective platform solutions.
- Supported cloud governance frameworks to improve consistency, reliability, and security.
- Aligned technology decisions with organizational goals and long-term growth strategy.

### **AWS DevOps Manager - Associate Consultant | Tata Consultancy Services**

Apr 2021 – Feb 2026

- Directed cross-functional cloud engineering teams and major migration initiatives.
- Engineered end-to-end DevOps solutions and reduced release cycle time by 30%.
- Championed Agile delivery models to improve efficiency by 20% and strengthen collaboration.
- Architected secure, scalable AWS environments and advised clients on cloud adoption and modernization.

### **Cloud Architect - Associate Consultant | Wipro Technologies**

Mar 2021 – Apr 2021

- Architected secure, scalable AWS solutions across compute, network, storage, and databases.
- Built repeatable environments with Terraform and CloudFormation.
- Implemented IAM, encryption, hardening, CloudTrail, and Config-driven controls.
- Optimized AWS cost and performance through right-sizing and storage reviews.

### **Team Lead - Application/Cloud Support Specialist | Accenture**

Jan 2017 – Feb 2021

- Led AWS infrastructure operations for high availability, performance, and compliance.
- Designed and deployed IaC solutions using CloudFormation and Terraform.
- Built scalable data pipelines and proactive monitoring with AWS CloudWatch.
- Developed CI/CD pipelines and delivery workflows with Bamboo, Git, Jira, and Confluence.

### **System Analyst - DevOps Engineer | ATOS India Pvt. Ltd.**

Aug 2014 – Jan 2017

- Instituted source control, CI/CD, and automated testing to improve release quality.
- Administered VPC, IAM, S3 hosting, and recovery strategies aligned with security standards.

### **System Administrator - Linux Specialist | Wipro Technologies**

Jan 2013 – Jul 2014

- Maintained and supported over 4,000 UNIX servers across mission-critical environments.
- Handled incidents, kernel upgrades, patch management, and SLA-focused performance optimization.

### **System Administrator - Consultant | Capgemini**

Jun 2010 – Nov 2012

- Administered access controls, permissions, LVM, Samba, Apache, and DNS infrastructure.
- Improved observability using Nagios and SNMP-based monitoring for hardware diagnostics.

## **Server Engineer - On-the-Job Trainee | HCL Infosystems Ltd.**

Mar 2009 – Jun 2010

- Installed Linux distributions and managed users, quotas, and permissions.
- Set up SSH, FTP, DNS, DHCP, NFS, and SAMBA for internal and client environments.
